About us

Franklin Biotech is an animal health by nutrition provider. We are a Dutch family-owned company specialized in unlocking nature's true potential. Franklin Biotech develops, manufactures and markets high-quality, branded animal feed and drinking water solutions enabling producers to boost animal health and performance through increased feed utilization, improved gut health and optimized immune status.

We help the animal nutrition industry secure safe food supply for future generations.

Plus Buti® DUO

Plus Buti® DUO delivers a highly-concentrated butyric acid source in multiple glycerol-ester forms alleviating the need for a coating and supplying higher active ingredient content. These active compounds boost intestinal health and integrity, and enable direct and indirect pathogen control.

Benefits

-  Increased performance through a boost in ADWG for broilers, piglets and sows
-  Improved carcass yield through better absorption and utilization of nutrients
-  Cost-effective and superior target-released butyrate relative to coated formulations of butyric acid

Characteristics

- ✓ Active compounds: alpha-monoglycerides, diglycerides and triglycerides of butyric acid
- ✓ Available in dry and liquid forms
- ✓ Free-flowing, non-caking and dust-free for easy handling
- ✓ Neutral taste and odor, and heat-stable
- ✓ Suitable for mash feeds, pelleted feeds and premixes
- ✓ Proven efficacy in poultry, swine, calves and aquaculture
- ✓ GMP+ FSA assured
