About us

Franklin Biotech is an animal health by nutrition provider. We are a Dutch family-owned company specialized in unlocking nature's true potential. Franklin Biotech develops, manufactures and markets high-quality, branded animal feed and drinking water solutions enabling producers to boost animal health and performance through increased feed utilization, improved gut health and optimized immune status.

We help the animal nutrition industry secure safe food supply for future generations.

Plus Lauri®

Plus Lauri® is a concentrated alpha-monolaurin product. The bioactive ingredient in Plus Lauri® allows for an antibacterial and antiviral effect. Moreover Plus Lauri® modulates the immune system, controlling pro-inflammatory cytokines, activating and attracting leukocytes to the site of infection.

Benefits

-  Improved gut microbiome through inhibition of pathogenic bacteria
-  Higher antibody count leads to better vaccine efficacy
-  Reduction of pro-inflammatory response resulting in more energy available for growth

Characteristics

- ✓ Active compound: pure alpha-monolaurin and anti-caking agents
- ✓ Available in dry and liquid forms
- ✓ Neutral taste and odor, and heat-stable
- ✓ Suitable for mash feeds, pelleted feeds and premixes
- ✓ Proven efficacy in poultry, swine, ruminant and aquaculture
- ✓ GMP+ FSA assured
