Minimizes nutrient and
energy loss

About us

Franklin Biotech is an animal health by nutrition provider. We are a Dutch family-owned company specialized in unlocking nature's true potential. Franklin Biotech develops, manufactures and markets high-quality, branded animal feed and drinking water solutions enabling producers to boost animal health and performance through increased feed utilization, improved gut health and optimized immune status.

We help the animal nutrition industry secure safe food supply for future generations.

Plus Leci®

Plus Leci® is a concentrated source of hydrolyzed lecithin, known as lysophospholipids. These active compounds allow for an accelerated nutrient digestion and subsequent absorption through improved emulsification of fats and oils and enhanced cell membrane permeability of the intestines.

Benefits

- ↑ Increased performance through a boost in ADWG and a reduction in FCR
- Increases egg production and milk yield
- 💰 Cost savings through diet reformulation by saving on energy, crude protein and amino acids using nutritional matrix

Characteristics

- ✓ Active compound: lysophospholipids (LPC, LPI, LPE and LPA)
- ✓ Available in dry and liquid forms
- ✓ Available in IP grade
- ✓ Free-flowing, non-caking and dust-free for easy handling
- ✓ Neutral taste and odor, and heat-stable
- ✓ Suitable for mash feeds, pelleted feeds and premixes
- ✓ Proven efficacy in poultry, swine, ruminant and aquaculture
- ✓ GMP+ FSA assured
